

PRE-CONFERENCE WORKSHOP

Research Methodology ****N40,000**

This comprehensive workshop is designed to equip participants with the knowledge and skills to conduct research in early childhood education. The class will prepare participants to undertake and manage quality research projects. The workshop will cover different topics on methodologies and techniques to strengthen participants research capacity. The workshop will delve into Qualitative research methods, including Phenomenology and Grounded Theory. Other topics including Participatory Action Research, Mixed Methods Research Design and Survey Development will be explored. To ensure a comprehensive learning experience, participants will engage in practical sessions through group discussions and presentations. Workshop materials including presentation handouts and learning resources will be provided

Manuscript Writing ****N40,000**

This workshop is aimed to support researchers further enhance their capacity to write and publish quality manuscript. Participants will be taught the fundamental structure of a scientific article and understand what to write in each section. From introduction to conclusion, the workshop will guide participants in structuring each part of the paper to ensure clear and effective writing. Participants will engage in a 'live edit' session where experts will review and provide feedback on selected abstracts submitted by the participants and offer insights into what top-tier journal editors seek in a manuscript.

Ethics in Early Childhood Education Research ****N30,000**

This workshop is designed to support early childhood researchers in making ethical research design decisions that safeguard the well-being of all participants, especially young and vulnerable children. Key topics will include obtaining voluntary and informed consent, ensuring anonymity and confidentiality, and avoiding exploitation or harm. The workshop will also cover maintaining high standards of professional integrity, rigor, and competence. Additionally, it will address the responsibilities related to research outputs and dissemination, emphasizing transparency and accuracy.
